

CORNERWORK • FOUNDING GYM PROGRAM

Your coach, between classes.

Members text how training went. Coaches reply by voice. The gym earns from it.

[Your name] • [email] • [date]

THE PROBLEM

Members don't quit loudly. They drift.

1 in 3

members leave within a year.
Average annual retention is 66.4%.

10×

higher cancel risk at 1 check-in a month (~20%) than at 12+ (~2%).

3 - 6 - 12

the months members are most likely to leave.

WHAT KEEPS THEM

People stay for people, not discounts.

Top reasons members stay

Friendly staff · **31%**

Community · **20%**

Accountability · **17%**

And injuries pull people out

81%

of BJJ athletes are injured in a year, losing ~34 days per injury. A month away is when members drift.

THE GAP

Coaching stops at the door.

Coaches can't remember what 100 people are working on. Gym software tracks check-ins and billing, not training.

HOW IT WORKS

Four steps, no app to download.

1

Athlete texts

A voice note or text after class, to the gym's number.

2

AI organizes

Summarizes, tags techniques, flags injuries.

3

Coach replies

A 30-second voice note, plus a drill from their library.

4

Everyone sees progress

Weekly recaps for athletes. A brief before every class for coaches.

Works with Mindbody and Gymdesk rosters and bookings

DEMO • THE ATHLETE

It's just texting.

Lands in the Messages app they already use. Log in 30 seconds; the coach's reply comes with a drill.

Demo Gym Coaching • Tue 8:40 PM

Good session, Ali? What clicked, anything sore?

Voice note 0:42 • clinch felt sharper, kept getting countered off the jab, shin sore

Coach Sam • voice note

Step off left after every jab. Skip heavy checks till the shin settles.

Drill • Jab + pivot exit (3 min)

Walk in knowing who’s on the mat.

Thu 7:00 PM • Muay Thai Advanced • 14 booked

	Ali R. • left shin sore since Mon	Injury
	Jordan M. • first class back in 3 weeks	Returning
	Priya K. • fight in 3 weeks, wants clinch	Fight prep
	Sam D. • 2nd visit • goal: fitness	New member

SUGGESTED FOCUS

Exit angles after the jab

5 of 14 mentioned getting countered off the jab this week. Low shin load.

DEMO • THE OWNER

Spot the drift before they stop showing up.

EARLY WARNING

Ali R. · shin injury, missed 2 classes

Chris T. · logs say “stuck,” fewer sessions

Their coach gets a nudge to check in, with context.

COACHED TIER

+\$[X]/mo

New revenue, coach reply times and logging rates.

FEEDBACK

Anonymous themes, shown once 3+ people raise them.

Confidential concerns go only to your named contact.

Works alongside the absence alerts in Gymdesk and Mindbody: they see who stopped coming; we see why, earlier

THE MODEL

Every \$25 splits three ways. No monthly fee.

Member pays the gym

\$25

per month, optional
“Coached” add-on. You
set the price.

Coach gets

\$10

per coached member,
through your normal
payroll.

Cornerwork gets

\$5

per coached member.
Nothing until you earn.

You keep

\$10

per coached member.
Profit from the first sign-
up.

You bill the add-on through your own software. We invoice you monthly for our share. No base fee, no contract.

THE MATH

Never costs you money.

No coached members, no bill. Every sign-up adds \$10 a month. Members you keep longer are on top of this.

Coached	Members pay	Gym keeps
0	\$0	\$0
5	\$125	+\$50
15 (typical)	\$375	+\$150
30	\$750	+\$300
60	\$1,500	+\$600

Monthly, at \$25 add-on with \$10 to the coach and \$5 to Cornerwork. “Typical” assumes 10–15% of a 100–150-member gym opts in.

“WILL MY COACHES ACTUALLY DO THIS?”

About an hour a week, paid, from their phone.

~1 hr

per week for 15 athletes

AI writes the summary and drafts the report. The coach listens, records a 30-second reply, taps a drill.

~\$150

per month for that hour

\$10 × 15 members. Roughly \$35–50 an hour, between classes, no extra floor time.

48h

reply promise

Unanswered logs go to the head coach. You see reply times per coach, so pay follows the work.

Time and pay figures are targets we'll confirm with founding gyms

NOT A REPLACEMENT

Your software sees check-ins. We see training.

Tool	Good at	Doesn't do
Gymdesk, PushPress, Mindbody	Billing, bookings, absence alerts after someone stops coming	Coaching between classes; knowing why they stopped
Mindbody Messenger[ai]	AI front desk: booking, sales follow-ups	Training feedback from a real coach
Trainerize, TrueCoach	Online personal-training programs	A gym floor with 100+ members and group classes
BJJ Notes, journaling apps	Athletes logging for themselves	Anything for the coach or the gym
Cornerwork	Texts → coach feedback → class briefs → early warning	Replace your software. It plugs into it.

Roster and bookings sync from Mindbody or Gymdesk. Absence alerts from your software can trigger a coach check-in.

SAFE BY DESIGN

Your members, your data, your rules.

Opt-in only

Members text JOIN to start and STOP to leave. Adults only at launch.

The gym owns the history

If a coach leaves, athletes are reassigned and records stay with you.

Injuries flagged, never diagnosed

AI alerts the coach. It gives no medical advice.

Concerns handled by people

Confidential reports go straight to your named contact.

3 gyms. Our share waived for 3 months.

You get

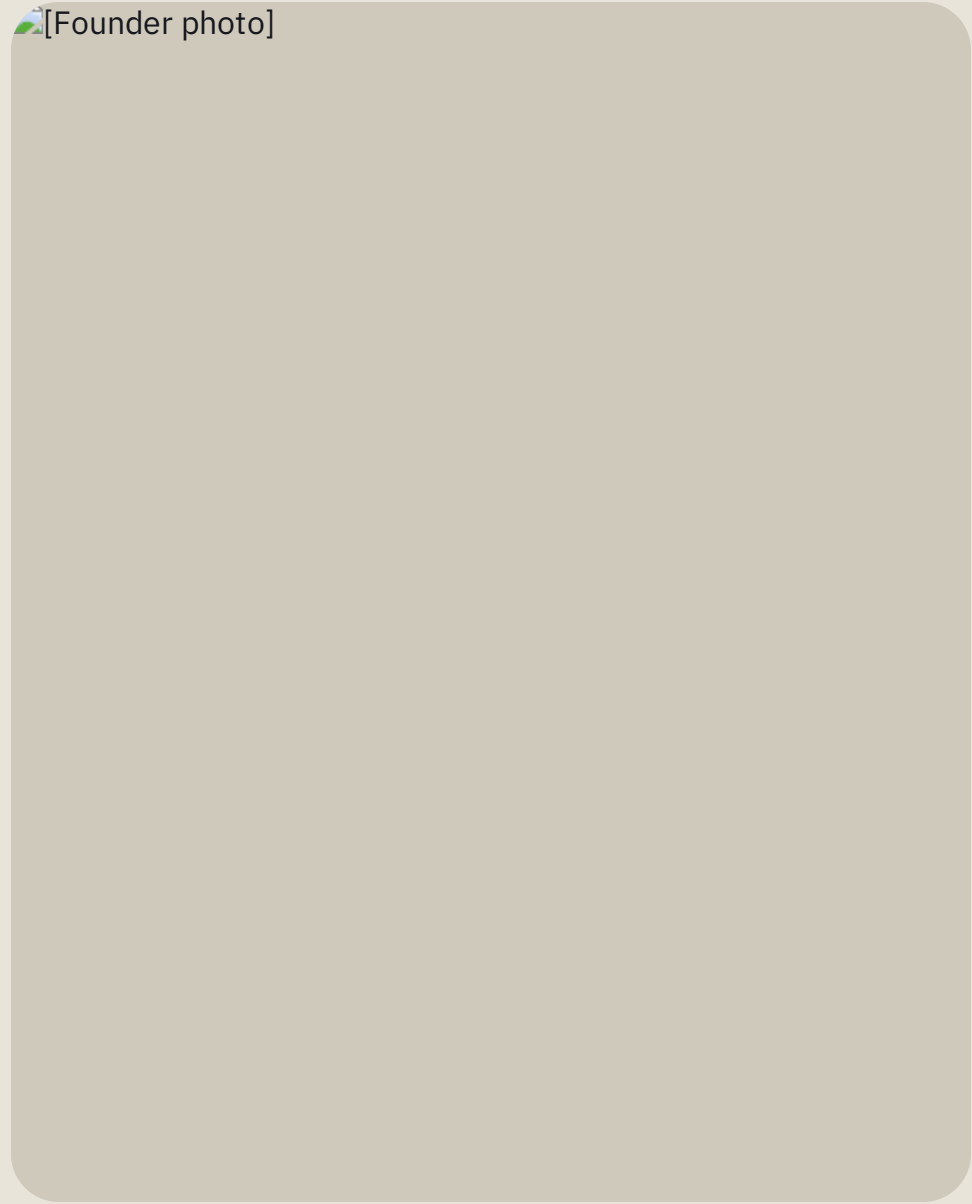

- Keep 100% of the add-on for 3 months
- Founding rate locked for life
- Set-up and coach onboarding done for you
- A say in what we build next

We need

- 1–2 coaches who'll commit an hour a week
- 20+ adult members offered the add-on
- An attendance export from your software
- A 20-minute check-in each month

You'll see

- How many members opt in
- Who's logging and who's drifting
- Coach reply times
- Attendance before vs after

[Founder photo]

WHO'S BUILDING IT

A fighter who writes software.

- Nationally ranked Muay Thai fighter, 9-1-1
- ~10 years training Muay Thai, BJJ, wrestling
- Senior software engineer, AI and data systems
- Built for gyms I'd want to train at

CORNERWORK

Be one of three founding gyms.

15-minute setup call. Live in your gym within a week.
